Crescent Standard Decorative Matboard complies with the standards set by the Fine Art Trade Guild.

Please refer to the website www.fineart.co.uk for more detailed information.

Are you looking for a decorative matboard for the framing of open end reproductions, general presentations, art prints and posters? Then Crescent Standard Decorative Matboard is the right solution for your requirements. The matboard is manufactured from wood pulp and is buffered with calcium carbonate to ensure an alkaline pH value of 7.5 to 8.5. This pH value will slow the damage to the artwork caused by the acid and lignin in wood pulp. This board does not guarantee a long term protection but this is not necessary since the boards are not used for framing valuable objects.

The core of the boards varies according to aesthetic tastes. Each core colour is created through a specific wood pulp process. Cream core boards are made of cleansed wood pulp, black core boards are made of cleansed and dyed wood pulp and white core boards are made of cleansed and bleached wood pulp. The white core boards will therefore not discolour and yellow unlike cream core boards over time.

Crescent Decorative Matboard is not suitable for conservation or museum quality framing. Please ask for the Better or Best specifiers to see the full range of boards available in these qualities.
